

8. Create a HTML registration form and to validate the form using JavaScript code.

Main Page.html

```
<!DOCTYPE html>
<html>

<head>
  <script>
    function validateForm() {
      var name = document.forms["myForm"]["fname"].value;
      var dobs = document.forms["myForm"]["dob"].value;
      var gen = document.forms["myForm"]["gender"].value;
      var mobile = document.forms["myForm"]["phone"].value;
      var address = document.forms["myForm"]["address"].value;
      if (name == "") {
        alert("Name must be filled out");
      } else if (dobs == "") {
        alert("Date of birth must be filled out");
      } else if (gen == "") {
        alert("Gender must be filled out");
      } else if (mobile == "") {
        alert("Mobile number must be filled out");
      } else if (address == "") {
        alert("Adress must be filled out");
      } else {
        alert("Form Validated Successfully!!!");
      }
    }
  </script>
</head>

<body>

  <h1>HTML Registration Form</h1>
  <form name="myForm" onsubmit="return validateForm()" method="post">
    <fieldset>
      <legend>Registration</legend>

      <label for="name">Name* :</label> <input type="Text" name="fname"><br>
      <label for="dob">Date of birth* :</label> <input type="date" name="dob"><br>
      <label for="male">Gender* : Male</label> <input type="radio" name="gender">
      <label for="female">Female</label> <input type="radio" name="gender"><br>
      <label for="phone">Phone* :</label> <input type="number" name="phone"><br>
      <label for="address">Address :</label> <textarea rows="3"
name="address"></textarea><br>
      <label for="course :">Course :</label><select name="course">
        <option>-Select-</options>
        <option value="mca">MCA</options>
        <option value="bca">BCA</options>
```

```
        <option value="b.tech">B.tech</options>
    </select><br>
    <label for="arts">Hobbies : Arts </label><input type="checkbox" name="hobbie">
    <label for="sports">Sports </label> <input type="checkbox" name="hobbie">
    <label for="others">Others</label> <input type="checkbox"
name="hobbie"><br><br>
        <input type="submit" value="Submt">
        <input type="reset" value="Reset">
    </fieldset>
</form>

</body>

</html>
```

Output:-

The screenshot displays a web browser window with a single tab titled "8.html". The address bar shows the file path "D:/MCA/MCA%201st/HTML/8/8.html". The browser's bookmark bar includes "Apps", "Suggested Sites", "Xender Web", "Gmail", and "YouTube". A yellow alert box is overlaid on the page, stating "This page says" and "Mobile number must be filled out", with an "OK" button.

HTML Registration Form

Registration

Name* :

Date of birth* :

Gender* : Male ☐ Female ☒

Phone* :

Address :

Course :

Hobbies : Arts ☐ Sports ☐ Others ☐

The form is titled "HTML Registration Form" and contains several input fields: Name (filled with "Dilshad Muhammed"), Date of birth (filled with "18-Mar-2021"), Gender (radio buttons for Male and Female, with Female selected), Phone (empty), Address (empty), Course (dropdown menu showing "-Select-"), and Hobbies (checkboxes for Arts, Sports, and Others, all unchecked). There are "Submit" and "Reset" buttons at the bottom of the form. A validation error message is displayed in a yellow box, stating "Mobile number must be filled out".
